

## Cleaning Instructions

For a correct cleaning process, please follow the instructions below.  
**Caution!** Before getting started, make sure that the machine is unplugged from general switch.

1 Remove the **feeder plate** by unscrewing the central knob.  
*Then clean the feeder base with a wet cloth.*

2 Remove the **juice tray**.

3 Remove out the **filter**.

4 Remove the **tap** pressing softly both sides.

5 Remove the peel **buckets**.

6 Remove the **front cover**.

7 Unscrew the central knob of the **1Step Extraction Kit**.

8 Remove the **1Step Extraction Kit** by pulling it towards you with the stainless-steel handles.

9 Assemble the **blade protector** and then remove the **blade** by pulling the handle towards you.

10 Clean the **front part** of the machine with a soft sponge.

11 Remove the **anti drop tray and the filter**.

12 In case of podium models, clean the hopper with a soft sponge.

13 Take out the waste bin and clean inside the podium, making sure that there is no rest of pulp and peels.

14 Once all the parts have been disassembled, proceed to deep cleaning.

### Replacing parts.

For quick cleaning in the middle of the day, we recommend having a kit with spare parts. This Kit is made up of: a cover, 1Step Extraction Kit, Juice container and Filter.

The cleaning process will be explained in details for each one of the machine's components below.

## Cleaning instructions for components

### ! Cleanliness and hygiene warnings.

Zumex recommends cleaning the machine at least once or twice a day, depending on how much it is used in order to maintain optimal food hygiene conditions.

All the parts, except from the cover and the tap can be put in a **dishwasher** to clean them. Furthermore, if you have Silver or Graphite models do not put peel buckets as well.

Use a **degreaser product** for food use to be able to easily remove all traces of pulp and adhering wax. It is necessary to sanitize with a **disinfectant product** after each cleaning.

Cleaning of the extraction area and any of its removable parts must be done with a **sponge**. Do not use scouring sponges that could scratch the surfaces.

**Rinse with plenty of water** after sanitizing, in order to remove any remaining disinfectant.

## Daily cleaning

Blade, tap, juice container, filter, drip tray, feeder plate and front cover

1  
Clean piece by piece, by hand or in the dishwasher.  
*\*Check the recommendations regarding parts that can be washed in the dishwasher (pag. 2)*

2  
Clean the **feeding plate** in the dishwasher or with a soft sponge to remove the remaining particles still stuck to it.

3  
Clean the **cover** with a soft sponge to avoid damaging the material. Rinse with plenty of water.

## 1Step Extraction Kit

For a **quick cleaning**, clean the 1Step Extraction Kit assembled in a single piece under a tap or in a dishwasher.

1  
Clean the entire assembly with a sponge and soap in a single piece under a tap. Move the **pressing units** around to make sure that they are completely clean.

2  
The assembly can also be washed in a single piece in a **dishwasher**.

## Recommended cleaning instructions

### Midday Cleaning

Cover, 1Step Extraction Kit, Juice container, filter and tap

1 Remove the **juice container** and the **cover**.

2 Remove 1Step **Extraction kit** and the **blade**.

3 Clean piece by piece, by hand or in the dishwasher.  
*\*Check the recommendations regarding parts that can be washed in the dishwasher (pag. 2)*

## Recommended cleaning instructions
